

Business Sales Performance Analytics

Future Interns — Task 1 | Power BI Analysis Report

1. Project Objective

The objective of this project is to analyze Superstore sales data and identify patterns in revenue, profit, product performance, regional performance, customer segments, and monthly sales trends. The results are presented through an interactive Power BI dashboard to support data-driven business decisions.

2. Tools & Data Preparation

Tools: Power BI Desktop, Power Query, and DAX. **Dataset:** Sample Superstore sales data with 9,994 records and 21 fields.

Data preparation included checking missing values and duplicate records, correcting Order Date and Ship Date to proper Date types, validating Sales, Quantity, Discount, and Profit fields, and creating a dedicated Date Table for time-based analysis.

3. Key Performance Indicators

Metric	Result
Total Sales	\$2.30M
Total Profit	\$286.40K
Total Orders	5K
Total Quantity	38K
Profit Margin	12.5%

4. Dashboard

Interactive Power BI dashboard covering KPIs, monthly sales trend, category, regional, product, profit, and segment analysis.

5. Key Business Insights

- **Technology leads category sales:** approximately \$0.84M, ahead of Furniture and Office Supplies.
- **West is the strongest region:** approximately \$0.73M in sales and about \$105K in profit.
- **Consumer is the largest segment:** approximately \$1.16M in sales.
- **Year-end sales are stronger:** the trend rises notably around September and November–December.
- **Top product:** Canon imageCLASS 2200 Advanced Copier leads the Top 10 view at approximately \$62K in sales.

6. Actionable Recommendations

- **Prioritize Technology:** maintain inventory and targeted marketing for high-performing products.
- **Improve the South region:** investigate demand, pricing, discounts, product mix, and customer acquisition.
- **Strengthen Consumer retention:** use targeted promotions and loyalty initiatives.
- **Plan for seasonal demand:** prepare inventory and marketing ahead of stronger September–December sales.
- **Balance sales with profit:** evaluate revenue and profitability together when making decisions.

7. Conclusion

The analysis provides a clear view of Superstore business performance and highlights where revenue and profit are concentrated. The Power BI dashboard enables interactive exploration by year, category, and region, supporting better identification of growth opportunities and profitability improvements.
